Notice to Residents:

**Notice of Study Commencement
Municipal Class Environmental Assessment Studies**

**Casablanca Boulevard (RR10) North Service Road to Main Street (RR81) and
GO Station Access
and
Livingston Avenue Extension (RR512) - West of Emily Street to Main Street
(RR81)**

The Regional Municipality of Niagara (Niagara Region) is initiating two **Municipal Class Environmental Assessments (EAs)** for:

- the reconstruction of Casablanca Boulevard between the North Service Road and Main Street including the Livingston Avenue new GO Station access, and
- the Livingston Avenue Extension west of Emily Street to Main Street.

These two studies are being undertaken to identify transportation infrastructure requirements, timing, costs and associated approvals to address the area's projected growth including the implementation of a new Grimsby GO Transit Station, and to determine the long-term role of the Livingston Avenue Extension (west of Emily Street to Main Street) in the area's future transportation network. A formal Notice of Commencement for each of the studies will be placed in the local newspaper in the near future providing additional information and opportunities to provide feedback.

If you have any questions or require additional information, please contact either of the undersigned. Thank you for your assistance with this project.
